See Color Details at Night

Chroma24 redefines low-light surveillance by delivering vivid color imaging in low-light environments — without relying on supplemental lighting.

Proactively Detect Events through AI Analytic

VIVOTEK Smart VCA offers precise object and attribute tracking, providing detailed video analytics for targeted monitoring and quick searches at night.

Seeing loitering in the darkness

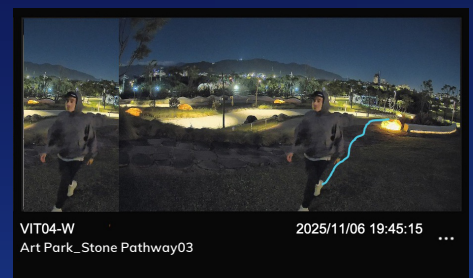

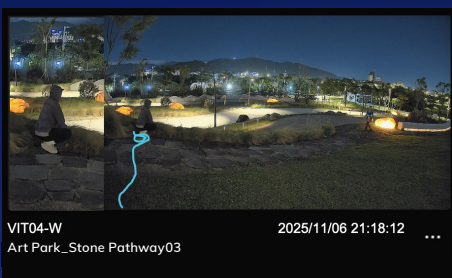

Identifying faces in the darkness

Chasing in the darkness

Search results in color — Even at night

Instantly locate evidence and eliminate hours of footage scanning. Think Search on VORTEX allows intuitive video searches by inputting natural language to locate accurate color snapshots and their paths even the incident happened at night.

Monitor Effortlessly with VORTEX Connect

It delivers real-time mobile push or email notifications to any device for proactive responses, and allows remote monitoring and management through a single platform.
